

Press release: November 2017

SEHTA and Beamline Diagnostics

SEHTA is proud to announce its partnership with **Beamline Diagnostics** who have been awarded a phase two contract of £700k funding from the latest SBRI Healthcare call aimed at exploring the expansion of the BeamLine screening system to colon cancer. This will allow Beamline Diagnostics to carry out a proof-of-concept 200 patient trial and bring the colon cancer work up to the same level as their existing oesophageal cancer screening product. The primary role for SEHTA will be to help Beamline understand and develop a commercialisation plan for their product.

Dr David Parry, CEO, SEHTA says *“We are delighted to be working with Beamline Diagnostics on their SBRI-funded project to develop further and commercialise their screening system for colon cancer”. “It’s always a pleasure to work with innovative energetic companies like Beamline who are developing ground-breaking technologies in such important clinical areas”.*

Dr Liberty Foreman, CEO & Co-Founder, Beamline Diagnostics says *“We are really looking forward to working with SEHTA over the duration of the SBRI contract. I first met SEHTA at one of their events. After watching some of the other companies they support present I thought we would be able to work really well together”.*

Notes for editors

South East Health Technologies Alliance

Founded in 2005, the **South East Health Technologies Alliance (SEHTA)** is one of the largest health technology networking organisations in the country. Since its inception, it has grown to **1300 members from 20 different countries**. SEHTA provides significant support to companies, universities and public and private health providers through publicly-funded resources and programmes and private consultancy services. SEHTA has built excellent relationships with Academia, Business and Care/Clinicians and it sees itself in a unique position as the interface between them. The company has particular expertise in digital health.

Beamline Diagnostics

BeamLine Diagnostics was founded in March 2015 by Dr. Liberty Foreman and Dr. Katherine Willetts during the final stages of their PhDs in the clinical applications of infrared spectroscopy. Their aim is to bring their research from the university laboratory to the hospital clinic to provide simple and effective point-of-care solutions for a wide range of diseases.
